The Inequality Paradox Douglas McWilliams, 2018-10-09 In his illuminating new book Douglas McWilliams argues that inequality is largely driven not by a conspiracy of the rich as Thomas Piketty suggests but by technology and globalization that have led to the paradox of rising inequality even as worldwide poverty drops But what are the implications of this seeming contradiction and what ultimately drives the global distribution of wealth What can societies do to reshape capitalism for the 21st century Drawing on the latest research McWilliams investigates how wealth is concentrated and why it persistently remains in the hands of very few In accessible and thought provoking prose McWilliams poses a comprehensive theory on why capitalism has not met its match in the form of increasingly disparate income distribution but warns of the coming wave of technological development the fourth industrial revolution that threatens to create a scarcity of unskilled jobs that will lead to even greater inequality and explains what governments can do to prepare for this From the inquisitive layperson to the professional economist or policymaker *The Inequality Paradox* is essential reading for understanding the global economy in its present state McWilliams is a fresh authoritative voice entering the global discussion making this book indispensable in preparing for the imminent economic challenges of our changing world

Beyond the Green Economy

Ricardo Abramovay, 2015-09-07 The world needs a new economy In spite of tremendous and growing material prosperity inequality is on the rise and the current organization of the Earth's natural resources has failed to address the basic human needs of billions of people This book exposes the bottlenecks of the present path of economic growth and discusses the main path to alternatives In spite of undeniable advances all evidence points towards the growing depletion of the very ecosystems that societies depend on By placing ethics squarely in the middle of economic life this book demonstrates the need for a new economy one that fosters unity between society nature economics and ethics It questions the most important scientific and political pillar that forms the basis for evaluating social resource use economic growth Written in a non specialist language this book is an introduction to the main issues involving sustainable development It will be essential reading for both students and professionals working in the field of socio environmental responsibility

Peasant Poverty and Persistence in the Twenty-First Century Julio Boltvinik, Susan Archer Mann, 2016-08-15 Peasants are a majority of the world's poor Despite this there has been little effort to bridge the fields of peasant and poverty studies *Peasant Poverty and Persistence in the Twenty first Century* provides a much needed critical perspective linking three central questions Why has peasantry unlike other areas of non capitalist production persisted Why are the vast majority of peasants poor And how are these two questions related Interweaving contributions from various disciplines the book provides a range of responses offering new theoretical historical and policy perspectives on this peasant world drama Scholars from both South and North argue that in order to find the policy paths required to overcome peasants misery we need a seismic transformation in social thought to which they make important contributions They are convinced that we must build upon the peasant economy's advantages over agricultural capitalism in meeting the challenges of feeding the growing world population while sustaining the environment Structured to encourage debate among authors and mutual learning *Peasant Poverty and Persistence* takes the reader on an intellectual journey toward understanding the peasantry

Agricultural Development and Food Security

in Africa Renu Modi, Fantu Cheru, 2013-08-08 The subject of food security and land issues in Africa has become one of increased importance and contention over recent years In particular the focus has shifted to the role new global South donors especially India China and Brazil are playing in shaping African agriculture through their increased involvement and investment in the continent Approaching the topic through the framework of South South co operation this highly original volume presents a critical analysis of the ways in which Chinese Indian and Brazilian engagements in African agriculture are

structured and implemented Do these investments have the potential to create new opportunities to improve local living standards transfer new technology and knowhow to African producers and reverse the persistent productivity decline in African agriculture Or will they simply aggravate the problem of food insecurity by accelerating the process of land alienation and displacement of local people from their land Topical and comprehensive Agricultural Development and Food Security in Africa offers fresh insight into a set of relationships that will shape both Africa and the world over the coming decades

Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India's problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates *Parliamentary Debates (Hansard)*. Great Britain. Parliament. House of Commons, 2012

Proceedings of the United States Naval Institute United States Naval Institute, 2013-07 *The emerging black middle class in South Africa and its relation to democracy* Tobias Erbert, 2013-11-19 Bachelor Thesis from the year 2013 in the subject Politics Region Africa grade 1 3 Free University of Berlin language English abstract 19 years after the promising democratic change in South Africa the country's challenges and disparities remain ubiquitous The huge majority of black South Africans still lives in poverty inequality has grown since the end of apartheid service delivery is a permanent problem and democratic institutions are at least partly weak Holden 2012 95 However the new South Africa is not only signified by the aggravation of disparities Over the last years the emergence of a black middle class became steadily more tangible and is today a mostly undisputed phenomenon Schrire 2005 271 Southall 2004 539 Everatt 2011 79 Some research has been conducted especially to determine definition criteria and the size of a black middle class Rivero et al 2003 Southall 2004 Visagie Posel 2011 Phadi Ceruti 2011 The total middle class in South Africa included 29% black South Africans in 1994 while

until 2011 their share had grown to 49.8% of the total middle class Holden 2012: 226-227. In absolute numbers the black middle class made up five million people in 2011 Visagie Posel 2011: 8-17 while South Africa had a total black population of around 41 million people Statistics SA 2011. Hence approximately 8.2% of the black population group belongs to the black middle class. Although there is research discussing the size of the black middle class in South Africa neither exists a comprehensive knowledge about the black middle class attitudes towards democracy nor is there a profound analysis to which extent the black middle class may contribute to democracy Everatt 2011: 79-80 Southall 2004: 528. In order to narrow these obvious research gaps this study asks the following research questions: 1. How does the emerging black middle class in South Africa understand democracy? And 2. How can the relation between the emerging black middle class and democracy be assessed or rather does the emerging black middle class in South Africa contribute to the strengthening of democracy in the country?
