This successful text provides students majoring in biochemistry, chemistry, biology and related fields with a modern and complete experience in experimental biochemistry. Its unique two-part organization offers flexibility to accommodate various requirements of the course and allows students to reference detailed theory sections for clarification during labs. Part I: Theory and Experimental Techniques provides in-depth theoretical discussion organized around important techniques. A valuable reference for instructors and students, it is particularly useful to instructors who prefer to use their own customized experiments. Part II: Experiments offers optimum flexibility through 15 tested experiments designed to accommodate the capabilities of laboratories and students at most four-year schools. Alternate methods are suggested and labs may be divided into manageable hour segments.
