now known about the mechanisms of embryonic development and the commanding role of genes For each paradigm under discussion he provides both a scientific image and a photograph he has taken in the human world These pairs of images imply powerful metaphors such as the similarities between communication among cells and among human beings or between rules embedded in the genome and laws that govern human society The book concludes with a glimpse of promising future possibilities including the generation of tissues and organs for use as spare parts      **The Software Encyclopedia 2001**,2001      **Readers' Guide to Periodical Literature** Anna Lorraine Guthrie,Bertha Tannehill,Neltje Marie Tannehill Shimer,1959      Biology of Insects David J.
