Bachrach, 2023-05-23 Inspire students to be responsible and self aware decision makers Management 15th Edition supports active and engaged course environments while centralizing new topics such as diversity equity inclusion and social impact With a refocus on career application the underlying goal is to translate foundational theories into lasting tools for students as they move beyond the classroom where their skills will be put to the test

*The Autonomous Revolution* William H. Davidow, Michael S. Malone, 2020-02-18 The bestselling authors of *The Virtual Corporation* describe how the rise of AI and virtual environments are ushering in an epic cultural transformation We are at the dawn of the Autonomous Revolution a turning point in human history as decisive as the Agricultural and Industrial Revolutions More and more AI based machines are replacing human beings and online environments are gathering our data and using it to manipulate us This loss of human autonomy amounts to nothing less than a societal phase change a fundamental paradigm shift The same institutions will remain schools banks churches and corporations but they will radically change form obey new rules and use new tools William H Davidow and Michael S Malone go deeply into the enormous implications of these developments They show why increases in productivity no longer translate into increases in the GDP and how zero cost one to many communications have been turned into tools for cybercrime and propaganda Many of the book s recommendations such as using taxes to control irresponsible internet behavior and enabling people to put their data into what are essentially virtual personal information safety deposit boxes are bold and visionary but we must figure out how we will deal with these emerging challenges now before the Autonomous Revolution overcomes us Lots of books talk about what s happening This book talks about the why behind the what It will transform your view of the future Geoffrey Moore bestselling author of *Crossing the Chasm* A provocative work combining historical inquiry present day technology crises and possible future solutions Library Journal
