Clayton,2008 **Agatha Christie's The Mysterious Affair at Styles in German and Dutch Translation** Marjolijn Storm,2016-01-12 Agatha Christie is one of the most popular and most translated authors of all time Yet there is little academic work on her writing This book sets out to rectify this No matter where in the world you are Hercule Poirot is a name that conjures up certain associations The detailed analysis of the original text three German and two Dutch translations of The Mysterious Affair at Styles however shows that his depiction differs immensely between the individual texts In the course of this book reasons for these differences are found via the analysis of the shifts of status of Agatha Christie as an author of detective fiction and of translations from English in Germany and the Netherlands During this exploration the discovery will be made that when translated escapist literature such as Christie s detective fiction actually becomes a highly political affair Understanding and Applying Medical Anthropology Peter J. Brown,Svea Closser,2016-07

The editors of the third edition of the seminal textbook *Understanding and Applying Medical Anthropology* bring it completely up to date for both instructors and students. The collection of 49 readings, 17 of them new to this edition, offers extensive background description and exposes students to the breadth of theoretical, methodological, and practical perspectives and issues in the field of medical anthropology. The text provides specific examples and case studies of research as it is applied to a range of health settings, from cross-cultural clinical encounters to cultural analysis of new biomedical technologies and the implementation of programs in global health settings. The new edition features a major revision that eliminates many older readings in favor of more fresh, relevant selections; a new section on structural violence that looks at the impact of poverty and other forms of social marginalization on health; an updated and expanded section on Conceptual Tools including new research and ideas that are currently driving the field of medical anthropology forward, such as epigenetics and syndemics; new chapters on climate change, Ebola, PTSD among Iraq/Afghanistan veterans, eating disorders, and autism, among others; recent articles from Margaret Mead Award winners Sera Young, Seth Holmes, and Erin Finley, along with new articles by such established medical anthropologists as Paul Farmer and Merrill Singer.

Rape, Victims, and Investigations Shana Maier, 2014-06-13

Despite changes to laws and attitudes, rape continues at epidemic levels worldwide. As gatekeepers to the criminal justice system, law enforcement officers are important to the processing of rape cases, and their interactions with victims can potentially affect the victim's reaction to and recovery from rape. In order to better understand rape and the processing of cases through the criminal justice and legal systems, *Rape Victims and Investigations* explores the unique perceptions and experiences of detectives who respond to rape victims and investigate rape cases. The detective's investigation is the foundation of the prosecution's case; the book considers factors that contribute to the challenging nature of rape investigations, such as lack of evidence or a clear, credible victim statement. Detectives' perceptions of victims' revictimization by the criminal justice and legal systems are also explored. The book also looks at specific causes of police stress and burnout related to working rape cases, financial struggles faced by departments, and ways to meet these challenges. By integrating previous research within the context of rich interview data, *Rape Victims and Investigations* provides deep insight for readers and will contribute to the continued improvement of treatment of victims by the criminal justice system. The book will be essential reading for academics, students, law enforcement officers, those who provide services to sexual assault victims, and victims themselves.
