Weymouth, 1923. An accurate study of the cause and extent of

this apparent diminution must await knowledge of at least the fundamental facts of the life history of this clam The more important features are considered to be the habits enemies and mortality of the adult the rate of growth and the factors affecting it the age at certain significant periods particularly at sexual maturity and at the time when the legal size is reached the most common age of clams forming the commercial catch the season of spawning and the productivity and the habits enemies and mortality of the young *Pollution of Interstate Waters, Missouri River* United States.
