autobiographical essays by notable African Americans on how they succeeded in college and the completely revised and updated directory of more than 950 colleges and universities      *The Black Student's Guide to High School Success* William J. Ekeler, 1997-05-28 Provides strategies tactics and tools to help African American junior high and high school students structure successful educational careers Includes essays by fifteen educators and is supplemented by success stories of contemporary African American high school students      **The Black Student's Guide to College Success** ,1993 Covers general skills of getting along in college the personal experiences of several famous people and the programs available at specific colleges and universities      **School Counseling for Black Male Student Success in 21st Century Urban Schools** Malik S. Henfield, Ahmad R. Washington, 2015-11-01 Discussions and research related to the salience of Black male student needs and development in relation to their general success and well being is well documented in many fields Indeed many studies have found that healthy masculine identity development is associated with a number of positive outcomes for males in general including Black males In school counseling literature however this discussion has been relatively absent particularly regarding those students living in urban contexts Indeed research devoted to the study of Black males in the school counseling literature focuses almost exclusively on race and issues associated with its social construction with only cursory if any attention given to their masculine identity development as a function of living in urban communities and attending urban schools Based on this lack of information it is probably a safe assumption that intentional systematic culturally relevant efforts to assist Black males in developing healthy achievement and masculine identities based on their unique personal social academic experiences and future career goals are not being applied by school counselors concerned with meeting students needs School counselors are in a unique position nonetheless to lend their considerable expertise insights training and skills to improving life outcomes among Black males a population who are consistently in positions of risk according to a number of quality of life indicators Without knowledge and awareness of Black males masculine identity development in urban areas coupled with the requisite skills to influence the myriad factors that enhance and impede healthy development in such environments they are missing out on tremendous opportunities which other professions appear to understand and quite frankly seem to take more seriously As such this book proposes to accomplish two specific goals 1 Highlight the plight of Black males with specific emphasis on the ecological components of their lives in relation to current school culture and trends 2 Encourage school counselors to give more thought to Black male identity development that takes into consideration differential experiences in society as a whole and schools in particular as a function of the intersection of their race as well as their gender The first rationale for this book then is to highlight the plight of Black males with specific emphasis on the ecological components of their lives in relation to current school culture and trends e g standards based accountability practices in urban environments However I recognize the role of school counselors has never been fully integrated into educational reform programs As such their positions are often unregulated and determined by people in

positions of power who do not understand their training job specific standards and thus potential impact on the lives of Black male students As a result their vast potential to develop strong interventions designed to address the myriad racial and masculine factors that serve to enhance and impede Black males academic achievement is often unrealized Therefore the second reason for this special issue is to include the scholarship of professional school counselors and counselor educators with policy change in mind Scholars will be invited to contribute manuscripts that explore race masculinity and academic achievement in relation to the role of school counselors This is designed to encourage school counselors and counselor educators to give more thought to Black male identity development that takes into consideration differential experiences in society as a whole and schools in particular as a function of the intersection of their race as well as their gender
