**Automated Software Testing** Elfriede Dustin, Jeff Rashka, John Paul, 1999 A guide to the various tools techniques and methods available for automated testing of software under development Using case studies of successful industry implementations the book describes incorporation of automated testing into the development process In particular the authors focus on the Automated Test Lifecycle Methodology a structured process for designing and executing testing that parallels the Rapid Application Development methodology commonly used Annotation copyrighted by Book News Inc Portland OR *An Introduction to Testing Web Applications with Twill and Selenium* C. Titus Brown, Gheorghe Gheorghiu, Jason Huggins, 2007-06-18 This Short

Cut is an introduction to building automated web tests using two tools: `twill` and Selenium. `twill` is a simple web scripting language that can be used to automate web tests while Selenium is a web testing framework that runs in any browser and can be used to test complex web sites that make extensive use of JavaScript. The best way to use this Short Cut is to run through the examples. We expect that within an hour you can start writing your own functional tests in either `twill` or Selenium and within a day you will understand most if not all of the possibilities and the limitations of these tools.
