Alfred French,1990 *Automation Hits the Knowledge Worker* Janine Berg,Pawel Gmyrek,2023 The advent of Large Language Models LLMs like ChatGPT has sparked debates about their potential to automate knowledge work and transform the world of work This policy brief examines the current and potential impact of LLMs on knowledge workers The brief makes clear that while attention is often on job displacement the larger effect is likely to be on the transformation of the day to day tasks of knowledge workers It also discusses the importance of not only focusing on job quantity but also job quality Drawing on historical examples the brief argues that technology is neither inherently good nor bad but its impact depends on how it is managed Artificial Intelligence and Automation Nikolaos G. Bourbakis,1998 **Human Error in Aviation** R.Key Dismukes,2017-07-05 Most aviation accidents are attributed to human error pilot error especially Human error also greatly effects productivity and profitability In his overview of this collection of papers the editor points out that these facts are often misinterpreted as evidence of deficiency on the part of operators involved in accidents Human factors research reveals a more accurate and useful perspective The
