Modelling and Simulation in Science, Technology and Engineering Mathematics Surajit Chattopadhyay,Tamal Roy,Samarjit Sengupta,Christian Berger-Vachon,2018-10-24 This volume contains the peer reviewed proceedings of the International Conference on Modelling and Simulation MS 17 held in Kolkata India 4th 5th November 2017 organized by the Association for the Advancement of Modelling and Simulation Techniques in Enterprises AMSE France in association with the Institution of Engineering Technology IET UK Kolkata Network The contributions contained here showcase some recent advances in modelling and simulation across various aspects of science and technology This book brings together articles describing applications of modelling and simulation techniques in fields as diverse as physics mathematics electrical engineering industrial electronics control automation power systems energy and robotics It includes a special section on mechanical fuzzy optical and opto electronic control of oscillations It provides a snapshot of the state of the art in modelling and simulation methods and their applications and will be of interest to researchers and engineering professionals from industry academia and research organizations *Automatic Control System* ,2019 **Mathematical Computing and Sustainability** Shalli Rani,Syed Hassan Shah,Ayush Dogra,2025-10-20 The book is likely intended to provide a thorough knowledge of the complex relationships between computational intelligence mathematical computing and sustainability By taking an interdisciplinary approach the author may strive to connect theoretical frameworks with practical applications providing readers with a road map for navigating the intricacies of addressing long term difficulties The book could use case studies and examples to demonstrate how cutting edge technologies and mathematical models can be used to analyse and solve real world sustainability problems ultimately encouraging a holistic approach that fosters innovative solutions based on computational and mathematical principles This book is planned to cover the comprehensive investigation into the synergies between Computational Intelligence CI Mathematical Computing and Sustainability An examination of the possible impact of intelligent systems on sustainability new concepts and approaches for incorporating CI and mathematical computing into sustainable practices etc There will be chapters explaining the Exploration of upcoming technologies e g quantum computing bio inspired computing and their potential role in promoting sustainability *Recent Advances in Signals and Systems* Omid Ansary,Meng Lin,B. R. Shivakumar,2024-11-19 This book comprises select peer reviewed papers from the International Conference on VLSI Signal Processing Power Electronics IoT Communication and Embedded Systems VSPICE 2023 The book provides insights into various aspects of electronics and communication engineering as a holistic approach The various topics covered in this book include VLSI embedded systems signal processing communication power electronics and the Internet of Things The contents mainly focus on the most recent innovations trends concerns and practical challenges and their solutions This book is useful for academicians professionals and researchers in the area of electronics and communications and

electrical engineering *Advances in Fog Computing and the Internet of Things for Smart Healthcare* Joseph Bamidele Awotunde, Akash Kumar Bhoi, Paolo Barsocchi, Victor Hugo Costa de Albuquerque, 2025-11-18 *Advances in Fog Computing and the Internet of Things for Smart Healthcare* delves into the transformative impact of fog computing and IoT on modern healthcare systems. This comprehensive guide educates researchers and graduate students on the fundamental concepts of these technologies, illustrating their practical applications in healthcare. Real world use cases showcase the technologies' ability to enhance patient monitoring and personalized medicine. The book also addresses significant challenges such as privacy, security, data management, and regulatory compliance, providing strategies for overcoming them. Alongside its companion book *Fundamentals of Fog Computing and the Internet of Things for Smart Healthcare*, this volume empowers various industries to leverage IoT technologies while optimizing performance and system efficiency. It highlights the crucial role of fog computing in processing data closer to the source, ensuring faster and more efficient data processing and contributing to the creation of effective IoT ecosystems. This synergy between fog computing and IoT facilitates smarter applications and services, advancing the landscape of healthcare with more efficient, personalized, and accessible services. Provides a comprehensive introduction to fog computing, IoT technology, and their applications in healthcare, offering both technical and non-technical readers a clear understanding of the concepts. Showcases real world case studies and examples of fog computing and IoT implementations in healthcare settings, illustrating practical benefits and challenges. Provides strategic insights into how fog computing and IoT can be integrated to optimize resource allocation, patient care, and operational efficiency. Explores the ethical, privacy, and regulatory challenges associated with implementing these technologies in healthcare, guiding readers through the potential pitfalls. Discusses emerging trends and potential future developments at the intersection of fog computing, IoT, and healthcare, equipping readers with forward-looking perspectives.

HealthTech Horizons: AI-Infused Metaverse Solutions for Smart Healthcare Systems Paolo Barsocchi, Joseph Bamidele Awotunde, Biswajit Brahma, Akash Kumar Bhoi, 2025-12-01 This book bridges cutting edge technology with practical healthcare applications, offering readers a front row seat to the transformation of patient care, diagnostics, training, and system management. These technologies enhance diagnostics, patient engagement, and care delivery by creating smarter, more connected, and patient-centric systems. This book is organized into four key sections. The first part focuses on AI's role in diagnostics, predictive analytics, and early disease detection, showcasing how machine learning and data analysis improve accuracy and timeliness. The second part investigates metaverse applications, including virtual consultations, immersive therapies, and the design of mobile health (mHealth) solutions tailored for older adults, emphasizing accessibility and inclusivity. The third section presents integrated AI and metaverse solutions, such as digital twins, XR, edge computing, and real-time healthcare deployments, illustrating the potential for dynamic and intelligent care environments. The final part discusses critical issues surrounding data privacy, ethical governance, and security within virtual healthcare settings, highlighting
