

Generating Effective Discussion Questions

In addition to answering the bookmark questions, some teachers may find it worthwhile to have students generate their own questions to enrich discussions. This helps students develop critical thinking skills and provides for more open-ended discussion. It is suggested that each student prepare one additional discussion question for the first meeting, two for the second, and so on. In order for students to understand what makes an effective discussion question, the following lesson may be used.

Discussion Question Concept Attainment Lesson

Reproduce the following table onto a transparency.

Yes	No
How might the main character in the story react if she hadn't known the details about the fight?	What is the main character's name?
Why might the narrator choose to turn himself in even though he could have gotten away with the crime.	What did Laura say to her mother when she talked to her on the phone?
How will the main character's mother cope with the fact that her son has rebelled against the family's wishes?	Why does Jimmy claim to be afraid of heights?
What would you do if you were in the main character's position?	When can the main character leave the hospital?

Explain to students that you will present them with a series of questions. The questions will have some things in common but some of the questions are "Yes" examples and some are "No" examples. Ask students to think about the difference between the two types of questions.

Reveal one pair of questions at a time. For the first couple, ask students to think about the difference between the two. They may jot down some thoughts on a piece of paper. By the third set, have students share their thoughts with a partner and invite students to share their ideas. Then reveal the fourth set and ask students if they can add any more ideas about the difference between the two.
