The volume is written for advanced undergraduates, graduates, professionals, and lay people interested in or studying the mind. Hebb offers an increased understanding of the mind from a biological perspective that affects long-standing philosophical and psychological problems. Psychology and Philosophy were divorced some time ago, but like other divorced couples, they still have problems in common, writes Hebb. The first three chapters establish the methodological and philosophical basis for his biologically centered theory of behavior, including the evolution of the mind.
