From Meaning of Working to Meaningful Lives: The Challenges of Expanding Decent Work Annamaria Di Fabio, David L. Blustein, 2016-09-21 This Research Topic explores issues that are central to the continued relevance of organizational and vocational psychology and equally central to the well-being of individuals and communities. The cohering theme of this publication revolves around the question of how people can establish meaningful lives and meaningful work experiences in light of the many challenges that are reducing access to decent work. Another essential contextual factor that is explored in this volume is the Decent Work Agenda International Labour Organization 2008 which represents an initiative by the International Labour Organization. In this book we hope to enrich the Decent Work Agenda by infusing the knowledge and perspectives of psychology into contemporary discourses about work and well-being. Another inspiration for this project emerged from the UNESCO Chair in Lifelong Guidance and Counseling recently established in Poland in 2013 under the leadership of Jean Guichard which has focused on advancing research and policy advocacy about decent work. This new era calls for an innovative perspective in constructing decent work and decent lives: the passage from the paradigm of motivation to the paradigm of meaning where the sustainability of the decent life project is anchored to a meaningful construction. During this period when work is changing so rapidly leaving people yearning for a sense of connection and meaning it is fundamental to create a framework for an explicitly psychological analysis of decent work.

Public Health Reports, 2015. Investing in Skills for Inclusive Trade Marc Bacchetta, Cornelius Gregg, Stela Rubinová, Bolormaa Tumurchudur, 2017. In recent decades the global economy has experienced a profound transformation due to trade integration and technological progress as well as important political changes. This transformation has been accompanied by significant positive effects at the global level as increased trade integration has helped to raise incomes in advanced and developing economies lifting millions out of poverty. At the same time it has translated into changes experienced by individuals, companies and communities. While overall better job opportunities are on the rise, workers who are forced to leave their existing jobs may find it difficult to share in these improvements. Policies aimed at facilitating adjustment can reduce the number of those left behind by trade or technology while at the same time raising the net gains from these developments improving overall efficiency and boosting incomes. Given the role of skills in productivity and in trade performance as well as in access to employment and wage distribution a strong emphasis on skills development is vital for both firms and workers. This publication argues that in the current fast changing context of globalization where technology and trade relations evolve rapidly the responsiveness of skills supply to demand plays a central role not only from an efficiency perspective but also from a distributional perspective. Featuring results from the ILO's Skills for Trade and Economic Diversification STED programme this report shows that appropriate skills development policies are key to helping firms participate in trade and also to helping workers find good jobs.
