

AP Calculus AB Summer Assignment 2013

Welcome to the AP Calculus summer assignment! This summer assignment is a **self-paced, self-assessed** guide to help you review, develop, and hone some basic math skills that are essential for entering Calculus with a good foundation. We will not spend time relearning these skills in class. Instead, you are responsible for making sure you have a firm base for beginning the year in Calculus. While the Calculus material and concepts will be new, our class uses skills from all other math classes, including Algebra, Geometry, and Trigonometry. Additionally, it is important to be comfortable using the features on your graphing calculator.

The answers to the review will be posted on the Osbourn Park website by the end of the summer. Remember, this is a self-assessed assignment designed to help you strengthen your Pre-Calculus skills. Use the posted answers to determine which concepts need additional attention. Then, follow up with additional review and practice. Some helpful websites and video links are provided to get you started if you need review on certain topics. However, if you need additional help on a topic, you are encouraged to seek out additional resources (books, websites, videos, etc.) Good luck and have a great summer!
