Big Picture Pedagogy: Finding Interdisciplinary Solutions to Common Learning Problems Regan A. R. Gurung, David J. Voelker, 2017-09-29 Take a big picture look at teaching and learning Building on existing pedagogical research this volume showcases the scholarship of teaching and learning SoTL across the disciplines and takes it in a new direction In each chapter interdisciplinary teams of authors address a single pedagogical question bringing each of their home disciplines specific literature and methodologies to the table The result is a fresh examination of evidence based practices for teaching and learning in higher education that is intentionally inclusive of faculty from different disciplines By taking a closer more systematic look at the pedagogies used within the disciplines and their impacts on student learning the authors herein move away from more generic teaching tips and generic classroom activities and toward values knowledge and manner of thinking within SoTL itself The projects discussed in each chapter furthermore will provide models for further research via interdisciplinary collaboration This is the 151st volume of this Jossey Bass higher education series It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers

Basic Probability Theory with Applications Mario Lefebvre, 2009-10-03 The main intended audience for this book is undergraduate students in pure and applied sciences especially those in engineering Chapters 2 to 4 cover the probability theory they generally need in their training Although the treatment of the subject is surely sufficient for non mathematicians I intentionally avoided getting too much into detail For instance topics such as mixed type random

variables and the Dirac delta function are only briefly mentioned. Courses on probability theory are often considered difficult. However, after having taught this subject for many years, I have come to the conclusion that one of the biggest problems that the students face when they try to learn probability theory, particularly nowadays, is their deficiencies in basic differential and integral calculus. Integration by parts, for example, is often already forgotten by the students when they take a course on probability. For this reason, I have decided to write a chapter reviewing the basic elements of differential calculus. Even though this chapter might not be covered in class, the students can refer to it when needed. In this chapter, an effort was made to give the readers a good idea of the use in probability theory of the concepts they should already know. Chapter 2 presents the main results of what is known as elementary probability, including Bayes' rule and elements of combinatorial analysis.

The Impact of Tablet PCs and Pen-based Technology on Education Robert H. Reed, Dave A. Berque, 2010. A wide variety of disciplines are embracing Tablet PCs and similar pen-based devices as tools for the radical enhancement of teaching and learning. The Workshop on the Impact of Pen-based Technology on Education (WIPTE) was first held in 2006 to leverage this shared passion and to identify best practices in the educational use of pen-based computing.

2008 Physics Education Research Conference Charles Henderson, Mel Sabella, Leon Hsu, 2008-11-21. The 2008 Physics Education Research Conference brought together researchers studying a wide variety of topics in physics education. The conference theme was Physics Education Research with Diverse Student Populations. Researchers specializing in diversity issues were invited to help establish a dialog and spur discussion about how the results from this work can inform the physics education research community. The organizers encouraged physics education researchers who are using research-based instructional materials with non-traditional students at either the pre-college level or the college level to share their experiences as instructors and researchers in these classes.
