that consider Wittgenstein's treatment of the phenomenon of aspect perception in relation to the broader idea of conceptual novelty that is the acquisition or creation of new concepts and the application of an acquired understanding in unfamiliar or novel situations. Over the last twenty years, aspect perception has received increasing philosophical attention, largely related to applying Wittgenstein's remarks on the phenomena of seeing as found in Part II of *Philosophical Investigations* (1953) to issues within philosophical aesthetics. Seeing as, however, has come to occupy a broader conceptual category, particularly in philosophy of mind and philosophical psychology. The essays in this volume examine the exegetical issues arising within Wittgenstein studies while also considering the broader utility and implications of the phenomenon of seeing as in the fields of aesthetics, philosophical psychology, and philosophy of mathematics, with a thematic focus on questions of novelty and creativity. The collection constitutes a fruitful interpretative engagement with the later Wittgenstein as well as a unique contribution to considerations of philosophical methodology.
