The original book is still in print and much of it is still best practice for forecasting and purchasing inventory for hard goods distributors. This Vol 2 book includes new material on SKU level forecasting with the addition of external data, a big new section on store assortment planning, some best practice techniques for managing special situations such as multiple sources, hub spoke store networks, promotions, category management and supply chain collaboration. All the content is of my own design with what I feel is best practice in each of these areas. And this Vol 2 has some observations about the future of the automotive aftermarket in the U.S. This includes the impact of the Covid 19 pandemic in the hopefully short term and some longer term factors that will over time profoundly change the aftermarket.
