Welcome

Welcome

Thank you for purchasing Blackmagic Cinema Camera!

We have worked hard to produce a camera that's designed from the ground up to have a very wide dynamic range and to produce files that are "flat", which means they preserve this wide dynamic range. This will allow you to make your creative decisions by using the included DaVinci Resolve 9 color correction tools!

We think this means you get a cinema style shooting experience where you capture and preserve more of the image so you have as many creative options as possible. An added benefit of the 2.5K sensor is you capture more pixels than you need for HD so your HD images get a wonderful anti-aliased look, similar to shooting film!

We have also included a large screen for easy focus and metadata entry as well as standard file formats that work with all video software. We hope you connect to this camera in a creative way and produce some amazing looking images! We will be extremely excited to see what creative work you produce!
