Blame It On Texas:

The Bay Shrimpers of Texas Robert Lee Maril, 1995 Shrimpers who fish the shallow coastal waters of Texas fight a constant battle for survival contending with shrimpers who fish the deeper gulf waters competing with weekend sportsmen wrangling with government regulations and dodging environmentalists incriminations Add competition from the international market an ominous threat frequently overlooked by bay fishermen and the shrimpers chances of winning at least with their current lifestyle intact are slim In *The Bay Shrimpers of Texas* Lee Maril explores the successes and failures of the shrimpers who prowl remote bays rivers and estuaries for their livelihoods Through random sample surveys of fishermen participant observation and historical analysis he examines the political economic and social realities confronting the shrimpers and their families Legal and environmental constraints price instability work hazards and benefits only one percent of the shrimpers surveyed had health insurance rivalry with gulf and sport shrimpers and conflict with Vietnamese refugees are all factors that affect the outlook for shrimping Portraying the shrimpers lives on land and water Maril describes their boats equipment and various fishing strategies both legal and illegal used to survive in an increasingly competitive occupation He gives an in depth and personal look at an industry that in many ways has changed little over the last century and in others has haphazardly evolved as it enters into a ruthlessly competitive world marketplace The prospects for bay fishing a vital part of the cultural identity and tradition of many small coastal towns are uncertain By examining the past and clearing up misperceptions and myths Maril provides valuable insight into not just the future survival or demise of one industry in a global economy but the future of small business as a whole

Hot Takes Sadie Babits, 2025-06-02 It s Monday morning and your editor assigns you a story about a housing project where several residents have been hospitalized because of heat stroke Is this a climate story Is it a climate justice story No one would have thought so twenty years ago In fact when many of us were attending journalism school or reporting our first stories in newsrooms those terms did not even exist Today it s a whole different story Whether you cover the environment healthcare economics politics sports or any other beat the fact is you need to understand climate change to do your job Because climate affects every human and animal and plant on Earth that means it affects all our reporting You may know the basics when it comes to the science of human driven climate change But how about the major policies that determine global climate action or the growing number of legal climate related cases Have you considered what it means to practice journalism focused on solutions rather than offering up a puff piece What about how to cover the vast inequities generated from human caused climate change or how race and socioeconomics interact with climate Are you prepared to detect and debunk misinformation and to remove bias from your stories Climate change is dramatically

shifting so many aspects of our world journalism included So whether you re still a student or a fifty year veteran chances are you could use some up to date guidance on how to report on this critical and endlessly complex issue You have come to the right place No resource has all the answers but Hot Takes engages the big questions that will determine how climate change is covered and the stories we tell our audiences and ourselves Texas Department of Agriculture Bulletin Texas.
