Foundations of Complex-system Theories Sunny Y. Auyang,1998 Analyzes approaches to the study of complexity in the physical biological and social sciences Macroeconomics Olivier Blanchard,Alessia Amighini,Francesco Giavazzi,2021 An integrated global view of macroeconomics showing the connections between goods markets financial markets and labour markets worldwide This is a book rooted in the real world from the major economic crisis of the late 2000s to the profound economic effects caused by the COVID 19 pandemic from monetary policy in the US to Brexit the problems of the Euro area and growth in China it will help your students make sense not only of current macroeconomic events but also those that may unfold in the future Regulation and Economic Analysis R.L. Gordon,1994-04-30 Regulation and Economic Analysis A Critique Over Two Centuries argues that long experience with the practice of regulation creates a broad anti intervention consensus among economists This consensus is based on comparison of real intervention to real markets rather than an ideological preconception It is shown that economic theory can support all possible positions on intervention Much theory is too abstract to support any policy position many arguments about how intervention might help contain qualifications expressing doubts about whether the potential can be realized many theories illustrate the drawbacks of intervention The vast literature on these issues concentrates either on specific cases or polemics that exaggerate both sides of the argument Regulation and Economic Analysis seeks to show the depth of the discontent develop interpretations of economic theory that follow from skepticism about statism and provide selected illustrations The discussion begins with examination of general equilibrium theory and proceeds to discuss market failure with stress on monopoly and particularly what is deemed excessive concern with predatory behavior International trade issues transaction costs property rights economic theories of government the role of special institutions such as contracts the defects of macroeconomic and equity arguments for regulating individual markets environmental economics and the defects of public land management policies are examined
