changing Western worldviews towards humanity s relationship with the environment which is to a significant extent in the
eyes of the author determined by worldviews on the nature of history itself Both the views arising out of Christian
providential views of history and those based on the idea of endless progress in technological innovation and economic
growth are argued to be incapable of confronting today s massive environmental problems The author calls for resurrecting
and extensively modifying a version of the cyclical view of history described by Oswald Spengler in The Decline of the West
