**Attention Grabbing Tools** Jane Baskwill, 2012-12 It is widely accepted that when home and school work together children's learning improves Although this fact is readily acknowledged communication between school and home is still often one sided and remains a struggle for many teachers This book explores a wide range of tools take home information and materials parent conferences learning nights and digital and social media for teachers to use in establishing and maintaining the parent teacher relationship one that holds the child at the center of all education decisions

*Ethical and Inclusive Research with Children* Roseanna Bourke, 2020-04-02 The imperative to include children and young people in educational research and in more participative ways is educationally important when exploring policy and practice contexts It is also critical to recognise that children have the right to contribute to debates and can express their views through educational research on matters that affect them However the freedom to research alongside young people is only afforded if we continue to unmask the illusion that well intentioned research is always ethical This book presents an international set of storied experiences where researchers have been challenged and have changed the way they think incorporating and exploring ethics in research The contributors highlight the ethical dilemmas that can arise when children and young people are included in research agendas and their reflexive approaches to these dilemmas include being responsive to the cultural political and social contexts of the lives of the children and developing child friendly research approaches to ensure their voice is accessed in multiple ways These solution focused and local approaches facilitate a more ethical deliberative process where the establishment of trust is central to an ethical engagement with young people and their families and where the explication of ethical dilemmas can improve research practice This book is a critical resource for researchers and practitioners researching with and alongside children and young people This book was originally published as a special issue of the International Journal of Inclusive Education

[Storyboard Notebook](#) 16 Simple Storyboards,2020-01-30 What is storyboarding Storyboarding is about taking a script or a concept and turning it into a visual story using storyboards You need to be able to draw well enough to allow yourself or your production team to envision and develop your ideas test how they will work and highlight any potential obstacles with the structure or layout of the story before you begin production Therefore you need to practice Open a storyboard blank template and sketch your ideas If they don t work or if you come up with a better idea rub them out and scetch out new ones The more you understand about how to make your production visually interesting in your sketches the better your end product will be Add notes about what s going on in your images Refer to the front cover to see what you might like to record in the spaces above and below each panel but I have left the spaces blank inside the storyboard book because you will want to use different criteria according to each project or what stage you are up to in each project There is an index at the front of your storyboard movie maker to bookmark whatever suits your project best Initial thumbnails first draft new chapters new projects particularly good ideas etc By the end of the storyboarding notebook you will be able to go through your storyboard writing examples and track your progress and you will have a record of what works best for you Do more of what worked best I hope you become an awesome storyboarder Paperback 130 pages 8 5 x 11 **Vlog Planner** Gene S
