Enhance Your Creativity and Break Artist's Block Marilyn Z. Kahn, 2014-08-04 Several years ago I watched a program about creativity on PBS TV It talked about trying to teach creativity to children or adults Thinking about what the program was saying I asked myself Can people be taught creativity Then another question came to mind Isn't creativity part of our natural being I maintain all people are born innately creative If that is so what comes between a person's natural creative self and its expression in their lives With this principle in mind that we are all naturally creative I observed my students and artist friends and started to write down my observations and thoughts which became the basis and inspiration for the writing of my book Enhance Your Creativity and Break Artist's Block When students come to me and say I am not creative or I have no imagination I know it is not so It is that they do not know how to turn on their creative juices This gives me confidence to work with them and see what is holding them back It allows me to help them through the creative block This book Enhance Your Creativity and Break Artist's Block has 139 full color illustrations in which I show how I work with students to encourage their creative style I reveal to them and to you those thoughts that hold a person back You will recognize how you sometimes sabotage your own creativity Working with this book will allow you to enjoy exploration and innovation and find your own painting style whether working with a teacher or working on your own I believe that creativity is there and does not need to be taught It is important that as parents and teachers we must be careful not to thwart others' creativity In any field of endeavor art music writing business or science you must not allow yourself the easy

negativity that impedes your progress but follow the more challenging opportunities of exploration which are really more fun
