Small Sample Size Solutions Rens van de Schoot, Milica Miočević, 2020-02-13 Researchers often have difficulties collecting enough data to test their hypotheses either because target groups are small or hard to access or because data collection entails prohibitive costs Such obstacles may result in data sets that are too small for the complexity of the statistical model needed to answer the research question This unique book provides guidelines and tools for implementing solutions to issues that arise in small sample research Each chapter illustrates statistical methods that allow researchers to apply the optimal statistical model for their research question when the sample is too small This essential book will enable social and behavioral science researchers to test their hypotheses even when the statistical model required for answering their research question is too complex for the sample sizes they can collect The statistical models in the book range from the estimation of a population mean to models with latent variables and nested observations and solutions include both classical and Bayesian methods All proposed solutions are described in steps researchers can implement with their own data and are accompanied with annotated syntax in R The methods described in this book will be useful for researchers across the social and behavioral sciences ranging from medical sciences and epidemiology to psychology marketing and economics

Proceedings of the 3rd Universitas Lampung International Conference on Social Sciences (ULICoSS 2022) Ryzal Perdana, Gede Eka Putrawan, Bayu Saputra, Trio Yuda Septiawan, 2023-05-03 This is an open access book The 3rd Universitas Lampung International Conference on Social Sciences ULICoSS 2022 ULICoSS 2022 is an international conference organized by the Institute for Research and Community Services Universitas Lampung Indonesia The event took place on 6th 7th September 2022 in Bandar Lampung City on the Indonesian island of Sumatra This event will adopt a hybrid working model combining an in person event with an online meeting via Zoom Attendees and presenters are expected to interact in this way using technology to connect to global networks As has

been widely stated in the literature a number of reports and papers have examined the pandemic's negative effects with the majority of work to date focusing on COVID 19's negative impact on psychological well-being. Thus social adjustment is required for resilience in order to adapt to and change in the face of adversity. In other words it is clear that social adjustment which includes the specific behaviors and abilities that people use to deal with daily problems and adapt to changing circumstances is critical for global resilience today. As such this international conference which will feature five invited keynote speakers from the Czech Republic, Hungary, Indonesia and Japan is intended to serve as a forum for the dissemination of specific alternative and significant breakthroughs in rapid social adjustments for global resilience with an emphasis on global society, social welfare and development and innovative communication among other topics. Therefore we invite scholars, academics, researchers, experts, practitioners and university students to participate and share perspectives, experiences and research findings by submitting papers on a variety of topics relevant to the conference's theme and scope. All abstracts and papers submitted for consideration will undergo a double-blind peer review process to ensure their quality, relevance and originality.
