Understanding and Analysis: The California Air Resources Board Forest Offset Protocol Eric Marland,Grant
Domke,Jason Hoyle,Gregg Marland,Laurel Bates,Alex Helms,Benjamin Jones,Tamara Kowalczyk,Tatyana B. Ruseva,Celina
Szymanski,2017-03-28 This book is a product of the initial phase of a broader study evaluating the voluntary and regulatory
compliance protocols that are used to account for the contributions of forests in U S based greenhouse gas GHG mitigation
programs The research presented here is particularly concerned with these protocols use of the USDA Forest Service s
Forest Inventory and Analysis FIA data to describe forest conditions ownership and management scenarios and is oriented
towards providing regulators and other interested parties with an objective comparison of the options uncertainties and
opportunities available to offset GHG emissions through forest management Chapters focus on the protocols for recognizing
forest carbon offsets in the California carbon cap and trade program as described in the Compliance Offset Protocol U S
Forest Projects California Air Resources Board 2011 Readers will discover the protocols used for quantifying the offset of
GHG emissions through forest related project activity As such its scope includes a review of the current methods used in
voluntary and compliance forest protocols an evaluation of the metrics used to assign baselines and determine additionality
in the forest offset protocols an examination of key quantitative and qualitative components and assumptions and a
discussion of opportunities for modifying forest offset protocols in light of the rapidly changing GHG related policy and
regulatory environment Finally the report also discusses accounting and policy issues that create potential barriers to
participation in the California cap and trade program and overall programmatic additionality in addressing the needs of a
