

Child Development Observation Paper Examples Essay

Introduction

To understand a child's social growth and development, an observation is conducted to the child. It involves conducting tests on the child. This paper will review a brief study on a group of four children who belong to different age sets. Each of the two children belongs to the same age set but of different gender. The main focus of the study is to observe the cognitive development of the children in each segment. It will also outline social and emotional development of children (Grantham-McGregor et al, 2007).

Cognitive Development Tests for Children

The first test given to the children was the conservation test based on liquids. Initially, each child was presented with two jars half way filled with water. Each child was required to state the quantity of the water. They were also asked if the two liquids were equal in quantity. Next, the jars were refilled and this time one of the jars was three quarters full. The kids were expected to describe the quantity level of the water and whether they measured the same. In addition, the children were asked to describe themselves. Also they were given some questions among them included: what is the sun made of?

Additionally, other tests were conducted to understand the socio-emotional development in children. An observation was made on things that triggered the emotions of the four kids.

Observing Children

Keidy

The first child in our study is Keidy. She is a female aged five years old. She is at the junior level second stage. She was born on twenty-fourth October 2011. She is in a family of four children, where she is the lastborn of the four children. The five children are catered for by their mother, who is a single mother. In our first test, where she was required to determine the quantity of the liquids presented to her, Keidy could not differentiate the both levels of the liquid. She indicated that the liquids were equal even after the refill. Keidy described herself as a mom's baby. She also described the sun as something viewed up in the sky.

Keidy issues such as lack of attention to her made her cry. However, she was calmed down by promises and incentives. Her kind of anger is expressed through crying. She is afraid to be left alone in a place. She is close to her family members.

Jayden

Secondly, our study reviews baby Jayden, a male aged four years old. He was born on twelve December, 2012. He is in kindergarten stage two. He is the only child in their family. They reside
