Visible Thinking in the K-8 Mathematics Classroom Ted H. Hull, Don S. Balka, Ruth Harbin Miles, 2011-01-21 The key to students' success in math lies in a way of teaching that provides clear evidence of how students are thinking about problems and builds on that thinking to take them to a deeper level of understanding. Seasoned math educators Ted Hull, Don Balka, and Ruth Harbin Miles offer teachers a sequential and developmental plan for integrating visual thinking into current classroom practices and gradually but steadily initiating successful instructional changes in mathematics. Their new book provides teachers with numerous sample problems and classroom scenarios showing successful teacher interventions at work and offers guidance on how teachers can adapt traditional problems to promote visible thinking in their own classrooms.

 Striving to Improve Series targets students who for whatever reason are struggling to keep up with their peers The activities
 in the books are designed to prevent students from regressing any further at school The tasks are based on a modified
 curriculum so that students can work at their own pace and without constant supervision from the teacher This book Integers
 is focused on the Number and Algebra Strand of the Australian Curriculum for lower ability students and those who need
 further opportunity to consolidate these core areas in mathematics The section entitled Understanding Integers enables
 students to reencounter ideas of place value rounding estimation factors multiples and the concept of a directed number The
 section entitled Calculating With Integers walks students through the four core calculations Students explore addition and
 subtraction with two and three digit sums and can apply what they have learned to some real life application problems
 Similarly students explore the various levels of multiplication and division before applying them to a variety of applications
 Each section provides students with the opportunity to consolidate written and mental methods of calculation with an
 emphasis on process and understanding The activities can be used for individual students needing further consolidation in a
 mainstream classroom or as instructional worksheets for a whole class of lower ability students The activities are tied to
