The Mathematical Education of Teachers II Conference Board of the Mathematical Sciences, 2012 This report is a resource for those who teach mathematics

and statistics to PreK 12 mathematics teachers both future teachers and those who already teach in our nation's schools. The report makes recommendations for the mathematics that teachers should know and how they should come to know that mathematics. It urges greater involvement of mathematicians and statisticians in teacher education so that the nation's mathematics teachers have the knowledge, skills, and dispositions needed to provide students with a mathematics education that ensures high school graduates are college and career ready as envisioned by the Common Core State Standards. This report draws on the experience and knowledge of the past decade to update the 2001 Mathematical Education of Teachers report's recommendations for the mathematical preparation of teachers at all grade levels: elementary, middle, and high school. Address the professional development of teachers of mathematics. Discuss the mathematical knowledge needed by teachers at different grade levels and by others who teach mathematics such as elementary mathematics specialists, special education teachers, and early childhood educators. Each of the MET II writers is a mathematician, statistician, or mathematics educator with substantial expertise and experience in mathematics education. Among them are principal investigators for Math Science Partnerships as well as past presidents and chairs of the American Statistical Association, Association of Mathematics Teacher Educators, Association of State Supervisors of Mathematics, Conference Board of the Mathematical Sciences, and National Council of Teachers of Mathematics. The audience for this report includes all who teach mathematics to teachers, mathematicians, statisticians, and mathematics educators and all who are responsible for the mathematical education of teachers: department chairs, educational administrators, and policy makers at the national, state, school district, and collegiate levels.

Eco-Mathematics Education Nataly Chesky, Jack Milgram, 2021-10-18 Eco Mathematics Education strives to show how everyone can experience the embedded connection between mathematics and the natural world. The authors' sincere hope is that by doing so we can radically change the way we come to understand mathematics as well as humanity's place in the ecosystem. The book hopes to accomplish this by providing in-depth lesson plans and resources for educators and anyone interested in teaching and learning mathematics through an ecological/aesthetic perspective. All lessons are based on the inquiry method of teaching aligned to standards, incorporate art projects inspired by famous artists, and utilize recycled and/or natural materials as much as possible.
