CPP Exam ExamFOCUS Study Notes and Review Questions for the Certified Packaging Professional 2015 Edition ExamREVIEW, 2014-12-14 The CPP multiple choice exam has a coverage which is highly extensive in fact so extensive that I wouldn't recommend taking the exam until you are fully drilled on the relevant topics You know what I personally think Soroka's book is excellent it covers all the essential information that you need to know to tackle most exam topics plus many more practical information for on the job use outside of the exam all included in a 500 page text book Many CPP candidates are experienced professional who have been in the field of packaging for years that they know most of the practical how tos and all they need is to learn the principles concepts and science that are behind the practical techniques 500 pages worth of information is quite overwhelming for these busy professionals Some tried to have their focus on the review questions for each chapter and as a result they found themselves missing quite many items that were in fact not covered by the chapter review questions We believe that you need to get yourself truly familiar with the most important information by going through sufficiently focused revision This is where we fill the gap you may think of our product as the unofficial supplement to Soroka's book or you may view it as a standalone module with a focus on building up your exam readiness For the purpose of exam preparation you need to plan your study into a 3 stage process At the first stage you

review the official Soroka text Give yourself one to two months to go through the text chapter by chapter Then at the second stage you go through the chapter review questions Finally at the third stage you use our ExamFOCUS study notes to drill on the key topics for the best possible knowledge coverage prior to taking the exam As an effective learning aid implemented in the format of study notes the ExamFOCUS CPP Study Notes package is designed to present information in an easy to understand conversational format Notes are well written technically accurate and completely representative of the key information covered by the exam domains

In the practical real world a CPP may be a security manager an external consultant or a law enforcement agent For purpose of the exam however you want to position yourself as a hired consultant one who acts as an advisor to the company management The company is your client and you are helping it out You advise you guide and you recommend You need to understand your client If your client is absolutely new to security full scale interviews and statistical analysis on crimes may be necessary However if your client has a working security mechanism in place then you should conduct assessment basing primarily on inputs from management In other words management determines the depth and scope of the security project Management makes the decisions You suggest ways to improve then carry out the decisions made by management You don't normally make decisions for your client It is safe to say that you assume the role of project manager for your client's security project The security project would start by discussing the scope of work with your client The most important meeting between you and the client would be the initial goal setting and policy review meeting Senior management is going to get involved and you are going to act as the facilitator From this meeting you become aware of the level of risk your client is willing to assume and accept Your work would then start from there When working on a project it is important to understand the background and operation of the client You also want to know what you are up against Protection against vandalism is totally different from protection against terrorist attack A CPP is more on the planning and management side of security A security guard professional on the other hand is to provide client with professional protective services It is believed that the CPP certification is more general in nature while the PSP certification is way more specific and in depth in physical security We create these self practice test questions referencing the concepts and principles currently valid in the exam Each question comes with an answer and a short explanation which aids you in seeking further study information For purpose of exam readiness drilling this product includes questions that have varying numbers of choices Some have 2 while some have 5 or 6 We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas Think of these as challenges presented to you so to assess your comprehension of the subject matters The goal is to reinforce learning to validate successful transference of knowledge and to identify areas of weakness that require
