The Light Verb Construction in Japanese Tadao Miyamoto, 2000-02-15 This study deals with the so called Light Verb Construction in Japanese which consists of the verb suru do and an accusative o marked verbal noun VN There have been unresolved debates on the role of suru whether suru in VN o suru functions as a light or heavy verb The previous studies attempt to disambiguate VN o suru formations by relying solely on examining whether suru can be thematically light or not This study argues that the ambiguity does not stem from the weight of suru but from its accusative phrase whether it is headed by a thematic complex event VN or non thematic simple event VN Using a principles and parameters approach and employing ideas from conceptual semantics and theories of aspect this study demonstrates that the characterization of VN o suru formations arises not from the dichotic behavior of suru but from the dichotic behavior of the accusative phrase

Problem Solving Using UCSD Pascal K. L. Bowles, S. D. Franklin, D. J. Volper, 2012-12-06 To the Second Edition This book is designed both for introductory courses in computer problem solving at the freshman and sophomore college level and for individual self study The first edition of this book has been used for teaching introductory classes at University of California San Diego UCSD University of California Irvine UCI and many other schools This second edition is based on our experience using the text over the past six years with a broad range of students We have taught the course using variations on Keller s Personalized System of Instruction PSI The organization of this book is conducive to this approach but does not require it PSI methods allow slightly more material to be absorbed by the students than is the case with the traditional lecture recitation presentation PSI allows grading according to the number of chapter units completed In a 10 week quarter virtually all students who pass the course at UCSD and UCI complete the material covered in the first eleven chapters and the exercises associated with them A substantial portion complete the entire fifteen chapters For a conventional presentation under the semester system the 15 chapters should present an appropriate amount of material for the average student *The Lower Damodar River, India* Kumkum Bhattacharyya, 2011-03-29 Interweaving the human aspects of river control with analysis of hydro physical data including historical data over the last few centuries this monograph is a comprehensive evaluation of the Damodar s lower reaches While the Damodar River isn t an exceptional tropical river nor does it feature classic examples of river control structures it is unusual and worthy of study due to the fact that nowhere else in the tropical world have riverine sandbars been used as a resource base as well as for permanent settlements Based on their knowledge of river stages the inhabitants have fine tuned their land use to flood events applying a concept of flood zoning to the riverbed Every available space has been utilized rationally and judiciously This rare human environmental study analyzes the remarkable way in which immigrants unfamiliar with the riverine environment have adapted to the altered hydrologic regime of the river In doing so they have demonstrated a sophisticated understanding of the flood regime and the vagaries of an unpromising environment in their land use cropping and settlement patterns Spurred on by restricted social and economic mobility and

sometimes political constraints these self settled refugees have learned to adapt to their environment and live with the floods

Bhattacharyya's text is particularly timely as anthropogenic processes of this kind have not been adequately studied by geographers
