

Chapter 4: Cost Accounting

Basic explanation:

Cost accounting includes all costs incurred to manufacture and sell a product or provide a service.

"Costing" is the value placed on the use of resources with the purpose of making a profit.

Management of the business will require this information to determine the mark-up to be added to the cost to arrive at the selling price of the products and/or services.

KEY CONCEPTS:

| Direct material Cost | Cost of raw material used during the manufacturing process to manufacture finished products, e.g milk used for cheese. |
