

## Chapter 3 Lab 3-6, OSPF Troubleshooting Lab

### Topology

### Objectives

- Troubleshoot OSPF operation and configuration.

### Background

In this lab, you troubleshoot existing configurations to get a working topology. Some of these configurations are correct, and some are intentionally wrong. Your goal is to use troubleshooting techniques to fix anything in the scenario that prevents full IP connectivity. Full IP connectivity means every address in the scenario should be reachable from every router. If you do not know where to start, try pinging remote addresses and see which ones are reachable (either manually performing pings or using a Tcl script).
