*Bibliography* Gerard De Vries,1976-12 Thjs bibliography had its inception in 1967 when the compilers first attempted a  
comprehensive cov erage of the finite element literature using both manual and computer based retrieval Initially the data  
base was stored on a card index but this was subsequently transferred to punched cards and magnetic tape Computer  
processing was adopted at an early stage to derive the three index formats from the data base Over the subsequent years  
several versions of the bibliography were produced with two of these being made available in a report form to other  
researchers From the widespread interest in these documents it became evident that there was a need for a commercially  
available comprehensive bibliography in this area A major effort was undertaken to revise update and extend the data base  
resulting in this present volume The bibliography covers the period 1956 1975 primarily although some earlier publications  
of histori cal interest are included The citations are not restricted to the English language and documents are listed in many  
languages and from diverse places of origin All publication formats were accepted so that references will be found to books  
monographs journal papers and articles theses dissertations reports surveys and the like     **Elementary Dynamics of**
