**and Affordability in the Emerging Global Markets** Mihajlo (Michael) Jakovljevic,Kyriakos Souliotis,Wim  
Groot,2016-04-14 During the recent few decades global economic growth has been driven largely by developing world  
economies The ones with the most intensive pace of development were marked as emerging markets led by so called BRICS  
and N 11 countries Such changes inevitably reflected the global health arena A number of issues previously limited to  
established high income economies became popularly discussed topics on the agendas of public health policy makers across  
these regions Major challenges remain population aging rising incidence of prosperity diseases lack of universal insurance  
coverage and particularly provision of just and equitable access to medical care among the poor both in urban and rural  
communities A significant part of the difficulties faced by these societies are attributed to inefficient resource allocation  
strategies in health care and unsatisfactory funding strategies This Research Topic was created in order to address the core  
challenges of medical care financing and its affordability across the emerging global markets Contributions of both  
undergoing or finished original research as well as review style papers are welcomed All submitted manuscripts should deal  
with issues relevant to health care economics and policy in recognized global emerging markets Outside the aforementioned  
key markets BRICS Brazil Russia India China South Africa Next 11 Bangladesh Egypt Indonesia Iran South Korea Mexico  
Nigeria Pakistan the Philippines Turkey and Vietnam submissions referring to any of the dynamically developing Asian Latin  
America Eastern Europe or MENA countries are encouraged In addition to a variety of health economic evaluations and  
health policy analysis methodological and resource use studies are within the Topic scope Health policy considerations  
should be primarily focused on financing mechanisms and affordability of health care although other surrounding issues such  
as health insurance reimbursement and cost containment strategies will be considered      **The Cumulative Book Index**
