Clay's Handbook of Environmental Health Stephen Battersby, 2013-03-01 Clay's Handbook of Environmental Health since its first publication in 1933 has provided a definitive guide for the environmental health practitioner or reference for the consultant or student This twentieth edition continues as a first point of reference reviewing the core principles techniques and competencies and then outlining the specialist subjects It has been refocused on the current curriculum of the UK's Chartered Institute of Environmental Health but should also readily suit the generalist or specialist working outside the UK *Pest Management*, 1992 *Integrated Pest Management for Collections* Peter Winsor, David Pinniger, Louise Bacon, Robert Child, Kerren Harris, Dee Lauder, Julie Phippard, Amber Xavier-Rowe, 2011 Integrated pest management IPM is not a static approach but one that is constantly evolving Mass international travel climate change and other factors contribute to the spread of new pests and the pests themselves are constantly seeking out weaknesses in our defences An understanding of the threats pests pose to collections and the necessity for a systematic approach to combat them is now firmly embedded in the work of collection care practitioners In addition the trustees and sponsoring bodies of collecting institutions recognise that it is a significant and cost effective element of good collections management 2011 A Pest Odyssey 10 years later describes examples of how the IPM approach has been adopted by large and small institutions around the world and highlights the many lessons learned along the way Principal among these is never to become complacent and tied down to routine processes Another important lesson is the need to ensure colleagues understand and are involved with the process of pest management There is also a need to understand the wider implications of any pest control activity for example the effect of chemical treatments on DNA Coming out of the second Pest Odyssey conference this book will promote wider understanding and implementation of IPM as an integral part of any collection management programme The organisers and editorial team hope that everyone involved with the care of cultural heritage collections and buildings will find something of interest and value in this work **CRC**
