Division Word Problems

Giovanni baked cookies, cupcakes, and brownies to bring to his sister's birthday party this weekend.

- 1.) The first thing that Giovanni baked was 51 chocolate chip cookies, which he plans on distributing evenly in paper gift bags. If each paper gift bag will contain six chocolate chip cookies, how many cookies will be left over and not placed in a gift bag?

- 2.) Next, Giovanni baked 57 strawberry cupcakes which he plans to give to his 7 nephews who will be at the party. If he gives each nephew an equal number of cupcakes, how many will be left over?

- 3.) Finally, Giovanni baked brownies to share with all 30 guests who will be at the birthday party. If he can place 12 brownies on a baking sheet at a time, how many baking sheets will he need to bake 308 brownies at one time?

Stewart,2020-12-13 **Math Mammoth Foundational Word Problems** Maria Miller,2023-07-20 Math Mammoth Foundational Word Problems is a workbook intended for students in 3rd grade and above that need more practice with word problems I especially aim to help students in 4th 7th grades who have trouble with word problems and who need to go back to the beginning so to speak to learn to solve them The problems are generally based on a knowledge of third grade math such as regrouping in addition and subtraction the multiplication tables concept of division and calculating change The problems do not require long multiplication long division or calculations with fractions or decimals with the exception of money amounts The worksheets have examples and some instruction about common strategies for word problems Students are often encouraged to write down the calculations they do They are also encouraged to make a drawing or a sketch of the situation in the problem to help them understand the situation and to see what math operation is involved Overall most of the problems require two or more steps however some problem sets focus on differentiating what math operation should be used and those only require a single step Several problem sets are designed to help students to master problems that involve equal size groups These questions either ask for the total and are thus solved by multiplying or they ask for the size of the group or for the quantity of the groups one can write a missing number multiplication sentence such as $3 \times \underline{\quad} = 18$ or use division The book also includes word problems with fractions with large numbers with money geometry word problems and challenges in the form of puzzle corners You can download sample pages from this link https://www.mathmammoth.com/word_problems_Foundational_Word_Problems_samples.pdf
