Document Based Questions Middle School Reformation:

The Enduring Classroom Larry Cuban, 2023-10-10 A groundbreaking analysis of how teachers actually teach and have taught in the past The quality and effectiveness of teaching are a constant subject of discussion within the profession and among the broader public Most of that conversation focuses on the question of how teachers should teach In *The Enduring Classroom* veteran teacher and scholar of education Larry Cuban explores different questions ones that just might be more important How have teachers actually taught How do they teach now And what can we learn from both Examining both past and present is crucial Cuban explains If reformers want teachers to adopt new techniques they need to understand what teachers are currently doing if they want to have any hope of having their innovations implemented Cuban takes us into classrooms then and now using observations from contemporary research as well as a rich historical archive of classroom accounts along the way asking larger questions about teacher training and the individual motivations of people in the classroom Do teachers freely choose how to teach or are they driven by their beliefs and values about teaching and learning What role do students play in determining how teachers teach Do teachers teach as they were taught By asking and answering these and other policy questions with the aid of concrete data about actual classroom practices Cuban helps us make a crucial step toward creating reforms that could actually improve instruction

The Rise and Fall of Civic Education Michael Learn, 2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it *The Rise and Fall of Civic Education* *The Battle for Social Studies in a Shifting Historical Landscape* investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America's divisive politics fight to control the narrative of the disciplines within social studies

Teacher Agency in the Process of State Mandated Reform Kyle C. Ruggles,2009 Under No Child Left Behind NCLB federally funded schools and Local Educational Agencies LEAs that do not meet Adequate Yearly Progress A YP criteria for two consecutive years are designated Program Improvement PI mandating participation in school reform interventions In February 2008 the California Department of Education CDE released a corrective action plan mandate requiring all LEAs or school districts in Year 3 of PI to participate in intensive moderate light or other levels of technical support that includes participation in the District Assistance and Intervention Team DAIT process The DAIT process brings outside consultants and district office administrators into schools and classrooms for regular walkthroughs and assessments of improvement plan implementation Yet little is known about how these state mandates influence teachers instructional practices and decision making power or agency This study explores teachers perceptions of the DAIT process and how agency is influenced in an urban fringe pre kindergarten through grade 8 PI school district in California that volunteered to pilot the DAIT process during the 2006 2009 school years The socio cultural theory of learning Gallucci 2003 and the principal agent theory Ferris 1992 guide the analysis of this embedded and longitudinal multi case study of three middle schools and the district office within the PI school district Rich thick qualitative descriptions from 24 teachers and five district office administrators engaged in state mandated reform emerge from the single case and cross case analyses Teachers perceive the DAIT feedback as vague and lacking in teacher involvement in classroom visitations which led to teachers viewing the process as superficial Yet teachers also considered the DAIT process as beneficial in increasing teacher team reflection and

collaboration around a singular common instructional focus of reading comprehension which seemed to be positively associated with agency A variance of teacher agency levels was found to depend upon school context and how teachers perceived themselves while balancing the costs and benefits from DAIT feedback Findings also reveal that the DAIT process may have compromised teacher agency due to the lack of teacher participation and involvement in the development of the process potentially eroding teachers sense of professionalism
