C - Mounting Crossbar F - Rubber Hole Plug

IMPORTANT SAFETY INFORMATION

- IF YOU ARE NOT FAMILIAR WITH ELECTRICAL WIRING, IT IS RECOMMENDED THAT YOU SECURE THE SERVICES OF A QUALIFIED ELECTRICIAN WHO CAN ASSURE THAT THIS INSTALLATION MEETS LOCAL, STATE, AND NATIONAL CODES.
- BE SURE POWER IS TURNED OFF AT THE MAIN POWER PANEL OR FUSE BOX BEFORE INSTALLING OR REPLACING THE FIXTURE.
- Before installing this fixture, be sure to check with local ordinances regarding approved outdoor lighting. This fixture style may not be allowed in some areas.
- This fixture is for outdoor use only.
- The electrical system and the method of connecting the fixture to the system must be in accordance with local, state, and national electrical codes.
- This fixture is to be connected to a 120 Volts, 60 Hz power source. Connecting to a different power source may create a hazard and will void the warranty.
- This fixture should be mounted to a grounded junction box marked for use in wet locations.
- Do not use near or around flammable/combustible material or liquids.
- Do not attempt to open the motion sensor housing. There are no serviceable parts inside.
- Performance may be affected by temperature.

THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODE BY A PERSON FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED.

STEP 1: INSTALLING YOUR NEW SECURITY FLOODLIGHT.

TURN OFF THE POWER AT FUSE-BREAKER BOX.
Remove old lighting fixture. If installing at a new location, contact qualified electrician.
For optimal performance, fixture should be mounted on a wall at least 8 feet above ground.

Pull the supply (house) wires over the Mounting Crossbar (C). Install the Mounting Crossbar onto the junction box using the two Mounting Screws (A).

Secure base plate to junction box using the Fixture Screw (D). Press in rubber hole plug (F). Apply a weatherproof silicone caulk or sealant around the fixture base.

Position lamp holders downward at a minimum 45° and away from fixture housing a minimum of 2 inches. Aim the motion sensor at the center of the desired detection area.

STEP 2: MOTION SENSOR CONTROLS

See STEP 3 for more details on setting these controls.

Observe the two controls on the bottom of the sensor.
The **RANGE** (sensor sensitivity) control is located on the bottom left.
The **ON-TIME** (duration) switch is located on the bottom center.

RANGE (Sensor Sensitivity)

Sets the sensitivity of the motion sensor. Turn the dial clockwise to increase the sensitivity (range). Turn the dial counter-clockwise to decrease the sensitivity (range). The **RANGE** control should - in most cases, be set at the maximum setting. However, the sensitivity (range) may need to be set lower to avoid false triggering (small animals, cars, or nearby lighting) may require range setting to be dialed down.

ON-TIME (Duration)

Sets how long the light will stay on after motion is detected (1, 5, or 10 minutes). Slide the ON-TIME switch to the desired time duration. The **TEST** mode allows the motion sensor to activate during daylight.

STEP 3: SETTING THE MOTION SENSOR CONTROLS

SETTING UP OR MAKING ADJUSTMENTS TO THE MOTION SENSOR

- Turn the power OFF to the floodlight.
- Aim the motion sensor to the approximate center of the desired detection range. Caution: Do not aim the sensor above the horizon as direct sunlight may cause damage to the sensor circuitry.
- Slide the **ON TIME** switch to the **TEST** position.
- Turn the **RANGE** control (sensitivity dial) to the full clockwise rotation.
- Turn the power back ON to the floodlight.
- Set the **RANGE** of the motion sensor.
 - Have a person move around at the furthest distance of the desired detection area.
 - If the **RANGE** dial is at the maximum clockwise rotation and the light still has not turned on, it may be necessary to re-aim the motion sensor or the desired detection zone may be too far away. The sensor range is designed for up to 70 feet.
 - When the lights do turn on, have the person stand still until the light goes off. Once the lights are off, have the person move again to confirm the settings.
- To reduce false triggerings, decrease the **RANGE** (sensitivity).
- Slide the **ON TIME** switch to increase or decrease the time the light stays ON after motion is detected. The setting choices are 1, 5, or 10 minutes. NOTE: When making this adjustment during daylight in test mode, the light will remain ON for the set time duration you have selected and then turn OFF. Once the light is OFF, it will not turn ON again until motion is detected.

MANUAL OVERRIDE FEATURE

If the security floodlight is connected to a wall switch, the Manual Override Feature is available. The Manual Override Feature allows the unit to be turned ON or OFF manually during the night, bypassing the motion sensor.

Manual Operation: To manually turn the floodlight ON, turn the wall switch OFF and then ON again immediately within 2 seconds. The floodlight will turn ON and remain ON until the wall switch is turned OFF. If the wall switch was previously turned OFF for a period of time, turn the wall switch ON for at least 5 seconds and then use the OFF-ON procedure above to turn the floodlight ON manually. To manually turn the floodlight OFF, simply turn the wall switch OFF. This unit will not activate as long as the wall switch is in the OFF position.

Resetting to Automatic Operation: To return the security floodlight to automatic operation, turn the wall switch OFF for at least 5 seconds and then turn the switch back ON. The security floodlight will come ON for the time duration set and then turn OFF. The floodlight will now activate according to the settings on the motion sensor. Leave the wall switch in the ON position to operate the floodlight in automatic mode.

TROUBLESHOOTING

SYMPTOM	REMEDY
Does not function at all.	Make sure wall switch (if installed), is ON. Check that the circuit breaker, fuse and main circuit breaker or main power switch are on. Be sure sensor head is pointed downward towards the target area.
Floodlight cycles ON and OFF.	Redirect security floodlight away from heat sources such as a street, active sidewalk, barbecue grill, etc. Direct floodlight in a slightly different direction than sensor. Turn RANGE (Sensor sensitivity) control more counterclockwise.
Floodlight is continuously ON.	Turn wall switch OFF for at least 5 seconds and then turn switch to ON again. This will reset the fixture to normal (automatic) operations. If there is no wall switch, set circuit breaker OFF for at least 5 seconds and then turn circuit breaker ON again.
