

How to write a simple Academic project concept paper for a classroom assignment by Dr. Lango.

A concept paper enables in putting thoughts and ideas into paper for consideration for research. It is from the concept paper that one develops the research proposal which can either be business or academic oriented. Most students, and especially the postgraduate students who have a mandatory requirement of undertaking research, usually goes direct to the research proposal. Some quotas also have professed the school of thought that a concept paper and research proposal are the same. As good as they may seem similar, they are different in the process and presentation. The concept paper aim is to capture the thoughts and ideas while the research proposal captures the ideas in a structured manner for approval to research. Therefore, in order to write a simple concept paper, follow these steps:

1. Concept paper title

Every paper must have a title and concept paper is not left out as one needs to have a title that summarizes what the paper is about. The title should be as brief as possible and to the point such that by a glance one would know exactly the paper's intention. *Example:*

"Leveraging on Mobile Payment Methods to gain Competitive Advantage by local based businesses"

2. Introduction

Introduce the concept by giving a brief on how it will contribute to the organization or company having more opportunities as a result. Also, state your understanding of the main objective of the targeted area of implementation clearly introducing the gap intended to be addressed. An introduction is like the sitting room of the concept paper as it determines a lot on the person proposing the concept. During presentations, this section also, act as the persona guide to how the rest of the presentation is preempted. *Example:*

Mobile payment methods have popularity with big businesses operating in large towns and cities across the world. These payment methods enable the business customers to access their cash at the point of sale and do not need to have physical money to complete their transactions. This study will therefore help in understanding the mobile payment methods preferences for the local based business and how and why these preferences have failed to prevail. The research will therefore address that gap that is viewed as the low uptake of mobile payment methods by the local based businesses which are essentially operating in remote areas. This concept builds upon the various insights that have been undertaken by various researchers in the business and information technology field to bridge the gap of strategic implementation of information technology systems in business to gain competitive advantage.
