

helps business leaders understand the risks they will encounter associated with future activities or operations. Business management solutions help them understand the complexity of regulatory compliance and regulatory uncertainty and help them manage it.

Business leaders also need advanced systems, implemented in a single unified manner, to reduce internal risks associated with the way they use their internal information, including business performance metrics and other inputs to drive their internal decision-making. When operations are complex, business leaders change systems to address their requirements and add more data to an enterprise without adding complexity. And by offering business intelligence to support understanding and managing their current system, business leaders can understand and manage their operations and their business system that more effectively.

"The addition of Microsoft Dynamics AX to our business lets us approach the future with even more confidence, knowing that we have the IT infrastructure in place to support us. We know that Microsoft Dynamics AX has the robustness and flexibility to help us meet changing compliance and reporting guidelines." *—John Smith, Chief Financial Officer, ABC Company*
