Review Questions

- 1.1 This answer will be student dependent.
- 1.2 Observation, testing and explanation.
- 1.3 (a) A law is a description of behavior based on the results of many experiments which are true while a theory is a tested explanation of the results of many experiments.
 (b) An observation is a statement that accurately describes something we see, hear, taste, feel or smell while a conclusion is a statement that is based on a series of observations.
 (c) Data are the observations made while performing experiments.
- 1.4 A theory is valid as long as there is no experimental evidence to disprove it. Any experimental evidence that contradicts the theory therefore, disproves the theory.
- 1.5 Matter has mass and occupies space. All items in the question are examples of matter.
- 1.6 A physical change does not change the chemical composition of matter. Melting, boiling, change of shape, or mass, and the formation of a mixture are examples of physical changes to matter.
 A chemical change changes the chemical composition of matter. Formation of new compounds from the reaction of other substances is an example.
