demanded in the workplace and students suffer the consequences Mathematics and science curricula can play a critical role in solving this dilemma In this comprehensive review of 23 exemplary curricula programs the authors offer an easy to use guide for tying curriculum to workplace experiences from a hematology laboratory to an agricultural setting to a soda bottling company these programs illustrate concrete real life situations to which students can relate and derive motivation Learn how to Meet the goals of science mathematics and technology education Meet national curriculum standards Chart key characteristics of successful curricula Connect curriculum to workplace contexts Create your own curriculum materials This book is a must for mathematics and science educators curriculum developers and supervisors and educators in school to work programs and vocational courses
