OECD,2015-03-25 This report provides an analysis of the impact of a range of corrupt practices on economic growth and development in four key sectors utilities and infrastructure extractive industries health and education **The impact of corruption on development and economic performance** Daniel Detzer,2010-07-08 Seminar paper from the year 2010 in the subject Business economics Miscellaneous grade 1 0 Berlin School of Economics Global Governance language English abstract During the last decades corruption became an important topic About twenty years ago the issue started to gain increasing attention Different Organization engage in the fight against corruption This is a remarkable change compared to the situation before the 1990s Back then most people did not see it as a pressing problem Actually it was more seen as an integral part of doing business Most European countries allowed for tax deductibility of bribes Even the World Bank not constricted by such national concerns was avoiding the topic The changed perception of corruption has manifold reasons Foremost the geopolitical situation changed remarkably During the cold war governments despite their corruptness were supported to make sure they were not joining the communist bloc After the end of this ideological competition the imperative to tolerate and not to address issues like corruption and abuse of political power ceased to exist Last but not less important the USA not constraint by geopolitical considerations had economic interest to put the topic on the agenda While for US companies bribing abroad was forbidden most other developed countries used graft to initiate business abroad Therefore the US had a special interest to push for anti corruption laws to level the playing field for its companies From a western normative and moral point of view this fight against corruption on the international level seems to be a desirable development However if those were the only reasons for this crusade it could be misperceived as another example of the imposition of rules from the Global North on the Global South Then again if corruption has negative impacts other than moral concerns it would legitimize this movement Prevailing corruption might influence the development and economic performance of a country In today s perception development and economic performance includes a variety of indicators which improve people s quality of life Therefore after having narrowed the definition of corruption as it is understood within this paper the correlation between corruption and some of those indicators will be examined After this basic assessment the relationship between economic growth as one of the indicators for development and corruption shall be illuminated closer The question whether there is a causal relationship and what the channels of this connection are shall be explored
