Mathematics for Engineers and Scientists Vinh Phu Nguyen, 2025-01-28 A majority of mathematics textbooks are written in a rigorous concise dry and boring way On the other hands there exist excellent engaging fun to read popular math books The problem with these popular books is the lack of mathematics itself This book is a blend of both It provides a mathematics book to read to engage with and to understand the whys the story behind the theorems Written by an engineer not a mathematician who struggled to learn math in high school and in university this book explains in an informal voice the mathematics that future and current engineering and science students need to acquire If we learn math to understand it to enjoy it not to pass a test or an exam we all learn math better and there is no such a thing that we call math phobia With a slow pace and this book everyone can learn math and use it as the author did at the age of 40 and with a family to take care of

Explorations of Mathematical Models in Biology with MATLAB Mazen Shahin, 2013-12-24 Explore and analyze the solutions of mathematical models from diverse disciplines As biology increasingly depends on data algorithms and models it has become necessary to use a computing language such as the user friendly MATLAB to focus more on building and analyzing models as opposed to configuring tedious calculations Explorations of Mathematical Models in Biology with MATLAB provides an introduction to model creation using MATLAB followed by the translation analysis interpretation and observation of the models With an integrated and interdisciplinary approach that embeds mathematical

modeling into biological applications the book illustrates numerous applications of mathematical techniques within biology ecology and environmental sciences Featuring a quantitative computational and mathematical approach the book includes Examples of real world applications such as population dynamics genetics drug administration interacting species and the spread of contagious diseases to showcase the relevancy and wide applicability of abstract mathematical techniques Discussion of various mathematical concepts such as Markov chains matrix algebra eigenvalues eigenvectors first order linear difference equations and nonlinear first order difference equations Coverage of difference equations to model a wide range of real life discrete time situations in diverse areas as well as discussions on matrices to model linear problems Solutions to selected exercises and additional MATLAB codes Explorations of Mathematical Models in Biology with MATLAB is an ideal textbook for upper undergraduate courses in mathematical models in biology theoretical ecology bioeconomics forensic science applied mathematics and environmental science The book is also an excellent reference for biologists ecologists mathematicians biomathematicians and environmental and resource economists Forthcoming Books Rose Army,2000 *Subject Guide to Books in Print* ,2001 **Student Solutions Manual to Accompany Elementary Linear Algebra** Stephen Andrilli,David Hecker,2003 Selected solutions to problems **Linear Algebra Math 152 and Math 200** David Poole,2012 *Books in Print Supplement* ,2002 *Student's Solutions Manual [to Accompany]* Charles Henry Edwards,David E.
