#### General Safety Information

Air compressors are utilized in a variety of air system applications. Because the air compressor and other components (material pump, spray gun, filters, lubricators, hoses, etc.) used make up a high pressure pumping system, the following safety precautions should be observed at all times.

1. Read the instruction manuals for each component carefully before attempting to assemble, disassemble or operate your particular system.
2. Do not exceed the pressure rating of any component in the system.
3. Protect material lines and air lines from damage or puncture.
4. Never point a spray gun at oneself or any other person. Accidental discharge may result in serious injury.
5. Check hoses for leaks or worn condition before each use, making certain that all connections are secure.
6. Release all pressures within the system before attempting to service any component.
7. Follow all local electrical and safety codes, as well as the National Electrical Code (NEC) and the Occupational Safety and Health Act (OSHA).
8. Electric motors must be grounded and adequately grounded. This can be accomplished by wiring with a grounded metal raceway or by system, by using a separate ground.

To the bare metal of the motor frame, or other suitable means.

9. Always disconnect power source before working on or near a motor or its connected load. If the power disconnect point is out-of-sight, lock it in the open position and tag to prevent unexpected application of power.
10. All moving parts should be guarded.
11. Be careful when touching the exterior of an operating motor — it may be hot enough to be painful or cause injury. With modern motors this condition is normal if operated at rated load and voltage — modern motors are built to operate at higher temperatures.
12. Protect the power cable from coming in contact with sharp objects.
13. Do not kink power cable and never allow the cable to come in contact with oil, grease, hot surfaces, or chemicals.
14. Make certain that the power source conforms to the requirements of your equipment.
15. When cleaning electrical or electronic equipment, always use an approved cleaning agent such as dry cleaning solvent.
16. Wiping or cleaning rags and other flammable waste materials must be placed in a tightly closed metal container and disposed of later in
