1.1. Define the rate of reaction in a sentence.

1.2. List the four factors that influence the rate of reaction.

1.3. The reaction taking place between bromine water and methanoic acid can be described by the following equation: $\text{Br}_2 + \text{HCOOH} \rightarrow 2\text{HBr} + \text{CO}_2$

Bromine water is yellow, but the other reactant and the products are colourless. Choose a factor that influences the rate of reaction. Design an experiment to prove that the factor you chose does influence the rate of reaction.

The experiment designed to prove that the factor does influence the rate of reaction:

Predicted observation:

Explanation for predicted observation:

1.4. The rate of a chemical reaction can be described by a rate equation. Circle the letter in front of the correct answer for the reaction $\text{HIO}_3 + 5\text{HI} = 3\text{I}_2 + 3\text{H}_2\text{O}$:

a) $v = k[\text{HIO}_3][\text{HI}]$

b) $v = k[\text{I}_2][\text{H}_2\text{O}]$

c) It could not be given based on the equation of the reaction.

d) $v = k[\text{I}_2]^3[\text{H}_2\text{O}]^3$

e) $v = k[\text{HIO}_3][\text{HI}]^5$

Holt Chemistry Ralph Thomas Myers,2004 **Chemfile Skills Practice Experiments** Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2006 **Professional Development of Chemistry Teachers** Rachel Mamlok-Naaman,Ingo Eilks,George Bodner,Avi Hofstein,2018-05-09 Continuous professional development of chemistry teachers is essential for any effective chemistry teaching due to the evolving nature of the subject matter and its instructional techniques Professional development aims to keep chemistry teaching up to date and to make it more meaningful more educationally effective and better aligned to current requirements Presenting models and examples of professional development for chemistry teachers from pre service preparation through to continuous professional development the authors walk the reader through theory and practice The authors discuss factors which affect successful professional development such as workload availability and time constraints and consider how we maintain the life long learning of chemistry teachers With a solid grounding in the literature and drawing on many examples from the authors rich experiences this book enables researchers and educators to better understand teachers roles in effective chemistry education and the importance of their professional development

The Language of Science Education William F. McComas,2013-12-30 The Language of Science Education An Expanded Glossary of Key Terms and Concepts in Science Teaching and Learning is written expressly for science education professionals and students of science education to provide the foundation for a shared vocabulary of the field of science teaching and learning Science education is a part of education studies but has developed a unique vocabulary that is occasionally at odds with the ways some terms are commonly used both in the field of education and in general conversation Therefore understanding the specific way that terms are used within science education is vital for those who wish to understand the existing literature or make contributions to it The Language of Science Education provides definitions for 100 unique terms but when considering the related terms that are also defined as they relate to the targeted words almost 150 words are represented in the book For instance laboratory instruction is accompanied by definitions for openness wet lab dry lab virtual lab and cookbook lab Each key term is defined both with a short entry designed to provide immediate access following by a more extensive discussion with extensive references and examples where appropriate Experienced readers will recognize the majority of terms included but the developing discipline of science education demands the consideration of new words For example the term blended science is offered as a better descriptor for interdisciplinary science and make a distinction between project based and problem based instruction Even a definition for science education is included The Language of Science Education is designed as a reference book but many readers may find it useful and enlightening to read it as if it were a series of very short stories **Critical Skills for Environmental Professionals** Jennifer Pontius,Alan McIntosh,2019-12-20 This textbook focuses on a set of skills based learning outcomes common among undergraduate environmental programs It covers critical scientific skills and ways of thinking that bridge the gap between the knowledge

based content of introductory environmental textbooks and the professional skills students of the environment need to succeed in both their academic programs and professional careers This emphasis on skills is gaining more traction among academic programs across the country as they shift focus from knowledge delivery to learning outcomes and professional competencies The book features clear methodological frameworks engaging practice exercises and a range of assessment case studies suitable for use across academic levels For introductory levels this text uses guided practice exercises to expose students to the skills they will need to master At the capstone level this text allows students to apply the knowledge they have gained to real world issues and to evaluate their competency in key programmatic learning outcomes A detailed answer key with rubrics customized for specific questions and sample answers at various competency levels is available to verified course instructors Access to these answer key resources can be obtained by contacting the Springer Textbook Team at Textbooks.springer.com
