and professional who needs to brush up on their skills is the first book to cover a wide variety of techniques that can be used by colorists no matter what system they are using. Whether you are using a video editing package with a color correction tool built in (Final Cut Pro, Premiere Pro) or a dedicated application (Apple Color, Assimilate Scratch, Baselight) or DaVinci, this book covers it all. From the most basic methods for evaluating and correcting an overall image to the most advanced targeted corrections and creative stylizations typically employed, you will find this highly organized book a solid reference that is easy to navigate. The accompanying DVD contains footage as well as cross platform exercises and project files for readers to experiment with. After reading the techniques, readers will learn to apply the methods that all of the color correction applications use, how to problem solve and troubleshoot, how to maximize the effectiveness of each tool that is available, and they will discover how to creatively combine techniques and tools to accomplish the types of stylizations that colorists are often called upon to create. All of Peachpit's eBooks contain the same content as the print edition. You will find a link in the last few pages of your eBook that directs you to the media files. **Helpful tips:** If you are able to search the book, search for "Where are the lesson files." Go to the very last page of the book and scroll backwards. You will need a web enabled device or computer in order to access the media files that accompany this eBook. Entering the URL supplied into a computer with web access will allow you to get to the files. Depending on your device, it is possible that your display settings will cut off part of the URL. To make sure this is not the case, try reducing your font size and turning your device to a landscape view. This should cause the full URL to appear.

Are you one of the many

editors who have decided you need to quickly learn Blackmagic's DaVinci Resolve. If you are then Rapid DaVinci Resolve was written for you. The 160 page book provides a comprehensive introduction to editing and color grading using the free version of DaVinci Resolve 15. Unlike the free version of Media Composer, DaVinci Resolve has not been crippled to force you to upgrade to the expensive version. And while Premiere Pro CC is a fine editor, do you really want to pay Adobe every month? Rapid DaVinci Resolve presents DaVinci Resolve 15 in a manner that eliminates your need to learn the application's massively complex menu system. Using a small set of logical mnemonic shortcut keys, Rapid DaVinci Resolve will teach you the application's precise 3 point editing system with a conceptual approach that makes editing efficient in the manner of Apple's FCP X. Rapid DaVinci Resolve enables you to be immediately productive with Resolve version 15. And to be productive with the beta version of Resolve 16 without having to learn a whole new way of cutting. Fusion, Fairlight, ResolveFX and the extra cost Studio version of Resolve are not taught by Rapid DaVinci Resolve. Why is Rapid DaVinci Resolve so much better than other Resolve books? Because the book was written by an experienced teacher, Steve Mullen. Ph.D. taught digital video production at Rutgers University and Electronic Cinematography at Philadelphia's University of the Arts. Steve was a Contributing Editor for Video Systems magazine. He has written for A/V Video Camcorder, DV millimeter Video Pro and Broadcast Engineering. For BE, he wrote several video production handbooks. He now writes for TheBroadcastBridge. He was a Product Marketing Manager for Data Translation which designed the MEDIA 100 video editing system. He was also International Sales Manager for PLAY, creator of the world famous TRINITY desktop video system. Steve has published many digital camcorder handbooks and tutorials covering the Avid Media Composer as well as Apple editing applications. He taught at the University of Minnesota and also in Minnesota at Carleton College. In both Boston and Tokyo, he worked at Bolt Beranek and Newman which manufactured massively parallel real time supercomputers. Steve now lives in Las Vegas. dvcinlv@gmail.com
