Development Agenda Leo Charles Zulu, Cristina D'Alessandro, 2018-04-19 This book offers a multifaceted examination of Africa's development into the post 2015 global agenda from a geographical perspective. As a diversified and highly applied discipline, geography has a lot to offer to global debates, nuanced analysis of problems, and the search for innovative solutions to advance the African development agenda beyond 2015. The end of the Millennium Development Goals (MDGs) era and the launch of the Sustainable Development Goals (SDGs) in September 2015 mark an important turning point for Africa and an opportune time to examine new challenges and opportunities that it faces. The regional disparities in MDG progress affirm an important geographic tenet that the unique yet internally differentiated socio-cultural, economic, political, ecological, biophysical, and historical context give Africa distinctive challenges and opportunities that demand particular approaches to development. This edited book presents innovative contributions examining Africa's development performance in diverse sectors during the MDG era as a basis for understanding prospects for its development in the SDG era and beyond. It offers new and innovative study perspectives and methodological approaches on urban transformation, development financing, food security, climate change, gender equality, health, and regional integration among other topics and useful insights for scholars, students, and development practitioners. This book was originally published as a special issue of *African Geographical Review*, the journal of the American Association of Geographers Africa Specialty Group, to mark the transition from MDGs to SDGs.

Africa and the World Francis Kornegay, 2020-02-02 *Africa and the World: Navigating Shifting Geopolitics* is one of the first books to analyse the global geopolitical landscape from an African perspective with a view to the opportunities and challenges facing the African continent. Authors in this edited volume argue for the need to re-imagine Africa's role in the world. As a cradle of humanity, a historical fountain of profound scientific knowledge, an object of colonial conquest, and today a collective of countries seeking to pool their sovereignties in order to improve the human condition, Africa has a unique opportunity to advance its own interests. Authors reflect on all these issues; they outline how developments in the global political economy impact on the continent and inversely how Africa can develop a strategic perspective that takes into account the dynamics playing out in a fraught global terrain.

Structural Change in Africa Carlos Lopes, George Kararach, 2019-06-25 Debates on African development continue to downplay the achievement of the continent's economic achievements and the perception of a conflict-prone continent continues. Many of the policy prescriptions externally imposed on African countries have done little to transform the continent, largely because they have been conceived and applied without context. Using literature from diverse origins, this book expands our knowledge about Africa and makes practical suggestions as to how successful development in a complex yet dynamic continent can be achieved. Widening the policy dialogue and providing alternative thinking on the key elements and full extent of opportunities and challenges towards achieving the socio-economic transformation of Africa, the book moves the debate from the rhetoric to reality. As a considered reflection on the Africa's transformation narrative, it outlines the practical pathways necessary for Africa's
