**Journal of Developmental Education**, 2012      *Teaching Math to Multilingual Students, Grades K-8* Kathryn B.

Chval, Erin Smith, Lina Trigos-Carrillo, Rachel J. Pinnow, 2021-01-07 Using strengths-based approaches to support development in mathematics. It's time to re-imagine what's possible and celebrate the brilliance multilingual learners bring to today's classrooms. Innovative teaching strategies can position these learners as leaders in mathematics. Yet as the number of multilingual learners in North American schools grows, many teachers have not had opportunities to gain the competencies required to teach these learners effectively, especially in disciplines such as mathematics. Multilingual learners, historically called English Language Learners, are expected to interpret the meaning of problems, analyze, make conjectures, evaluate their progress, and discuss and understand their own approaches and the approaches of their peers in mathematics classrooms. Thus, language plays a vital role in mathematics learning, and demonstrating these competencies in a second or third language is a challenging endeavor. Based on best practices and the authors' years of research, this guide offers practical approaches that equip grades K-8 teachers to draw on the strengths of multilingual learners, partner with their families, and position these learners for success. Readers will find: A focus on multilingual students as leaders; A strength-based approach that draws on students' life experiences and cultural backgrounds; An emphasis on maintaining high expectations for learners' capacity for mastering rigorous content; Strategies for representing concepts in different formats; Stop and Think questions throughout; and reflection questions at the end of each chapter. Try It! Implementation activities, student work examples, and classroom transcripts. With case studies and activities that provide a solid foundation for teachers' growth and exploration, this groundbreaking book will help teachers and teacher educators engage in meaningful, humanized mathematics instruction.
