General Safety Rules – For All Battery Operated Tools

WARNING: Read and understand all instructions. Failure to follow all instructions listed below may result in electric shock, fire and/or serious personal injury.

SAVE THESE INSTRUCTIONS

- WORK AREA**
- Keep your work area clean and well lit. Cluttered benches and dark areas invite accidents.
 - Do not operate tools in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust. Power tools create sparks which may ignite the dust or fumes.
 - Keep bystanders, children, and visitors away while operating a power tool. Distractions can cause you to lose control.

- ELECTRICAL SAFETY**
- Do not abuse the cord. Never use the cord to carry the tool. Keep cord away from heat, oil, sharp edges or moving parts. Replace damaged cords immediately. Damaged cords may create a fire.
 - A battery operated tool with integral batteries or a separate battery pack must be recharged only with the specified charger for the battery. A charger that may be suitable for one type of battery may create a risk of fire when used with another battery.
 - Use battery operated tool only with the specifically designated battery pack. Use of any other battery pack creates a risk of fire.

- PERSONAL SAFETY**
- Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use the tool while tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
 - Wear safety glasses. Do not wear loose clothing or jewelry. Contain long hair. Keep your hair, clothing, and gloves away from moving parts. Loose clothing, jewelry, or long hair can be caught in moving parts. Air vents often cover moving parts and should also be avoided.
 - Avoid accidental starting. Be sure switch is in the locked or off position before inserting battery pack into a tool with the switch on invites accidents.
 - Remove adjusting keys or wrenches before turning the tool on. A wrench or a key that is left attached to a rotating part of the tool may result in personal injury.
 - Do not overreach. Keep proper footing and balance at all times. Proper footing and balance is essential for the safe use of the tool in any situation.
 - Use safety equipment. Always wear eye protection. Dust mask, non-skid safety shoes, hand hat, or hearing protection must be used for appropriate conditions.

- TOOL USE AND CARE**
- Use clamps or other practical way to secure and support the workpiece to a stable platform. Holding the work by hand or against your body is unstable and may lead to a loss of control.
 - Do not force tool. Use the correct tool for your application. The correct tool will do the job faster and the rate for which it is designed.
 - Do not use tool if switch does not turn it on or off. A tool that cannot be controlled with the switch is dangerous and must be repaired.
 - Before making any adjustments, changing accessories, or storing the tool. Such preventative safety measures reduce the risk of starting the tool accidentally.
 - Store tools, tools, and accessories in a secure and safe place. Tools are dangerous in the hands of untrained users.
 - Keep tools, tools, and accessories away from other metal objects like: paper clips, coins, keys, nails, screws, or other small metal objects that can make a connection from one terminal to another. Shorting the battery terminals together may cause sparks, fire, or explosion.
 - Maintain tools with care. Keep cutting tools sharp and clean. Properly maintained tools, saws, chips and less likely to bind and easier to control.
 - Check for misalignment or binding of moving parts, breakage of parts, and any other condition that may affect the tool's operation. If damaged, have the tool serviced before use. Repairs should be made by qualified personnel.
 - Use only accessories that are recommended by the manufacturer for your model. Use of accessories that may be suitable for one tool, may create a risk of injury when used on another tool.

- SERVICE**
- Tool service must be performed only by qualified repair personnel. Service or maintenance performed by unqualified personnel may result in a risk of injury.
 - When servicing a tool, use only identical replacement parts. Follow instructions in the Maintenance section of this manual. Use of unlisted parts or failure to follow Maintenance instructions may create a risk of shock or injury.

Additional Specific Safety Rules

- WARNING:** Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contains chemicals known to cause cancer, birth defects or other reproductive problems. Some dusts may be especially harmful. Exposure to some dusts can be harmful. To reduce exposure, wear protective equipment, such as:
 - lead from lead-based paints,
 - crystalline silica from bricks and cement and other masonry products, and
 - asbestos from asbestos.

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals, work in a well ventilated area, and work with approved safety equipment, such as dust masks that are properly fitted and filter out microscopic particles.

- Avoid prolonged contact with dust from power sanding, sawing, grinding, drilling, and other construction activities. Wear protective clothing and wash exposed areas with soap and water. Allow dust to get into your mouth, eyes, or lay on the skin may promote development of cancer.**

A WARNING: Use of this tool can generate and/or disperse dust, which may cause serious and permanent respiratory or other injury. Always use NIOSH/MSHA approved respiratory protection appropriate for dust exposure. Clean particles away from face and body.

A CAUTION: Wear appropriate hearing protection during use. Under some conditions and duration of use, noise levels may contribute to hearing loss.

A CAUTION: When not in use, place tool on its side on a stable surface where it will not cause a tripping or falling hazard. Some tools with large battery packs will stand upright on the battery pack. Such tools may be easily overbalanced.

- The label on your tool may include the following symbols. The symbols and their definitions are as follows:**

V	volts	A	amperes
Hz	hertz	W	watts
min	minutes	mA	milliampere current
max	maximum	no	no load speed
Class II Construction	(grounded)	⚡	earth/ground terminal
Class II Construction	(double insulated)	!	safety alert symbol
BPM	beats per minute	min	minimum or reciprocation per minute

Important Safety Instructions for Battery Packs

Your tool uses a DEWALT 12V or 18V Lithium-Ion battery pack. Always be sure to include catalog number and voltage. Extended Run-Time battery packs deliver 25% more run-time than standard battery packs. Consult the chart at the end of this manual for compatibility of chargers and battery packs.

NOTE: Your tool will accept either standard or Extended Run-Time battery packs. However, be sure to use the correct battery pack for your tool. Do not use a battery pack that is not on the chart, or the best place to keep your battery is on the charger at all times. The battery pack is not fully charged out of the charger. Battery packs using the battery pack and charger, read the safety instructions below. Then follow charging procedure outlined.

READ ALL INSTRUCTIONS

- Do not incinerate the battery pack even if it is severely damaged or is completely worn.
- A small leakage of liquid from the battery pack cells may occur under extreme usage or temperature conditions. This does not indicate a failure. However, if the outer seal is broken, stop using the battery pack.
- Wash quickly with soap and water.
- If battery liquid gets into your eyes, flush them with clean water for a minimum of 10 minutes and seek immediate medical attention. **(Medical note: The liquid is 25-35% solution of potassium hydroxide.)**
- Charge the battery packs only in DEWALT chargers.
- Do NOT splash or immerse in water or other liquids.
- Do not store or use the tool and battery pack in locations where the temperature may reach or exceed 105°F (40°C) such as outside sheds or metal buildings in summer.
- CAUTION:** If the battery pack is damaged, do not insert into charger. Electric shock or electrocution may result. Damaged batteries should be recycled.
- NOTE:** Battery storage and carrying caps are provided for use whenever the battery is out of the tool or charger. Remove cap before placing battery in charger or tool.
- CAUTION:** Do not allow the battery pack to come in contact with conductive materials such as keys, coins, or other metal objects. The US Department of Transportation Hazardous Material Regulations (49CFR) actually prohibit transporting batteries in commerce or on airplanes. So when transporting individual batteries, make sure that the battery terminals are protected and securely mounted on the tool. Do not place the battery in a bag or container.
- CAUTION:** Battery pack must be securely attached to tool. If battery pack is detached, personal injury may result.

The RBRC Seal

The RBRC (Rechargeable Battery Recycling Corporation) Seal on the nickel cadmium and nickel metal hydride batteries (or battery packs) indicates that the battery is recycled and that the cost of recycling is covered by the manufacturer. It has already been paid by DEWALT. In some areas, it is illegal to place spent nickel cadmium and nickel metal hydride batteries in the trash or in the recycling stream and the RBRC program provides an environmentally conscious alternative. RBRC in cooperation with DEWALT and other battery users, has established programs in the United States and Canada to encourage the collection of spent nickel cadmium and nickel metal hydride batteries. Help protect our environment and conserve natural resources by returning the battery to a recycling center or to a retailer or to your local retailer for recycling. You may also contact your local recycling center for information on where to drop off the spent battery.

Important Safety Instructions for Battery Chargers

- SAVE THESE INSTRUCTIONS:** This manual contains important safety instructions for battery chargers.
- Before using charger, read all instructions and cautionary markings on charger, battery pack, and product using battery pack.
- CAUTION:** Electrostatic Discharge (ESD) is present at charging terminals. Do not probe with conductive objects.
- WARNING:** Shock hazard. Do not allow any liquid to get inside charger.
